SCOPE OF MOU

1. Training for Students in Life Skills or Skill Labs: This initiative involves providing students with hands-on training in essential life skills such as communication, time management, problem-solving, and leadership. Skill labs can offer practical training in specialized areas relevant to their field of study, such as diagnostic techniques, clinical procedures, surgical skills, etc., in a controlled environment. The objective is to equip students with practical knowledge and skills that enhance their employability and prepare them for real-world challenges.
2. Training for Faculty through various Faculty Development Programs: A Party may train the other Party's faculty through workshops, seminars, conferences, and training sessions, curriculum development, assessment methods, technology integration, research methodologies, etc. The objective is to enhance the teaching effectiveness, research capabilities, and professional growth of educators.
3. Research Projects in respective institutions: Both the Parties can collaborate and help each other on research projects conducted within their respective premises, subject to prior approval from the Institutional Ethical Committee. It would help identify and invite faculty members and students from the other institution to participate in research or development programmes. The terms and conditions for such participation will be worked out by mutual agreement between the Parties.
