POST EVENT REPORT

Event Title: Oral Pathologists Day

Date: February 25, 2025

Location: St. Joseph Dental College

Number of Participants: All Students and Faculty members

Organized by: Department of Oral Pathology and Microbiology

OBJECTIVES: To highlight the importance of oral pathology in dentistry, engage students and professionals through creative expression, and raise awareness on critical dental health issues.

OUTCOME: The Department of Oral & Maxillofacial Pathology marked the celebration of Oral Pathologists Day with a vibrant series of events held from February 20th to February 25th, 2025. The week-long celebration aimed to highlight the importance of oral pathology in dentistry, engage students and professionals through creative expression, and raise awareness on critical dental health issues. The festivities commenced on February 20, 2025, with a Fruit & Vegetable Carving Competition, creatively themed “Edible Analogies: Dentistry with Fruits and Vegetables.” Participants artistically represented various dental concepts using fruits and vegetables, blending science with artistic innovation. The event witnessed enthusiastic participation and served as a unique medium to communicate complex dental ideas in an engaging and visual manner.

On February 21, 2025, an e-Poster presentation event was organized with the theme “Legitimate Dentist vs. Dental Quack.” The session focused on distinguishing qualified dental practitioners from unlicensed individuals and emphasized the risks associated with seeking treatment from unverified sources. The e-Posters presented by participants were well-researched, informative, and visually compelling, sparking discussions among attendees and raising awareness about the importance of ethical dental practice.

These events formed a meaningful part of the Oral Pathologists Day celebration, fostering creativity, critical thinking, and public awareness while highlighting the significant role of oral pathology in healthcare.
