National Tooth Brushing Day
Report

Date: 13-11-2024

On the occasion of National tooth brushing programme Department of Public Health Dentistry conducted a Blind Fold Identification of Caries and a camp was conducted in a school.

Blind fold identification of caries: participants are instructed to cover eyes with cloth and instructed to detect the caries on the tooth drawing. All the patients, students including Interns and PGs participated in the competition.

Camp: Camp was conducted at De sales special child school, started with oral screening program followed by oral hygiene instructions are given to school students and brushing techniques are demonstrated on a tooth brush model to improve oral health.
